SMART WASTE MANAGEMENT SYSTEM

WEB APPLICATION USING NODE RED:

The screenshot shows the IBM Watson IoT Platform dashboard. The main view displays a list of devices with columns for Device ID, Status, Device Type, Class ID, and Data. A modal window titled "Device Type: abcd" is open, showing the configuration for a new event type. The modal includes a "Send" button, a "Schedule" section with a dropdown set to "Every Minute", and a "Payload" section with a JSON editor. The JSON payload is:

```

{
  "temp": random(0, 100),
  "Humid": random(0, 100)
}

```

The modal also has an "Upload a CSV file" button and "Cancel" and "Save" buttons at the bottom.
